Safety Data Sheet

Section 1 – Product and Company Identification

Product Name: FeLV (Thielen Strain) Purified Virus

Applicable Product(s): 10-250-000

Manufacturer: Advanced Biotechnologies Inc
9108 Guilford Rd
Columbia, MD 21046

Telephone: (410) 792-9779

Fax: (301) 497-9773

www.h-h-c.com

Section 2 – Composition/Information on Ingredients

Name: Tris **CAS Number:** 77-86-1

Name: Sodium Chloride **CAS Number:** 7647-14-5

Name: EDTA **CAS Number:** 60-00-4

Name: Feline Leukemia Virus

Section 3 – Hazard Identification

I. Biohazards

Category: WHO/NIH Risk Group 2

Emergency Overview: Biohazardous

Pathogenicity: FeLV is an RNA retrovirus that infects cats and is transmitted through saliva or nasal secretions. There is no evidence that FeLV can infect humans.

Potential Health Effects: Unknown

Host Range: Cats.

II. Chemical Hazards

Emergency Overview: Irritant

Routes of Entry: Skin contact, Eye contact, Inhalation, Ingestion

Potential Health Effects

Eyes: Causes eye irritation.

Skin: May be harmful if absorbed through skin. Causes skin irritation.

Ingestion: May be harmful if swallowed.

Inhalation: May be harmful if inhaled.

Section 4 – First Aid Measures

Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Contact a physician.

Skin Contact: Immediately wash skin with soap and plenty of water. Wash contaminated clothing before reuse. Contact a physician.

Inhalation: Move to fresh air. Contact a physician.

Ingestion: Wash out mouth with water provided person is conscious. Contact a physician.

Section 5 – Fire-Fighting Measures

Flammability of the Product: Unknown.

Extinguishing Media

Suitable: Use an extinguishing agent suitable for the surrounding fire.

Not Suitable: None known.

Section 6 – Accidental Release Measures

Personal Precaution: To minimize contact wear laboratory safety goggles, laboratory coat, and nitrile or latex gloves. Avoid breathing material.

Environmental precautions: Disinfect material before disposal.

Spill Containment: Take up with an absorbent material. Disinfect area with 3% hydrogen peroxide followed by 70% isopropanol.

Section 7 – Handling and Storage

Handling: Biosafety Level-2 (BSL-2) practices, containment equipment, and facilities are recommended. Although there is little evidence that infectious aerosols are a significant source of

www.h-h-c.com

laboratory acquired infections (LAI), it is prudent to avoid the generation of aerosols during the handling of clinical materials or isolates. Primary containment devices (Biological Safety Cabinet (BSC)) should be utilized to prevent exposure of workers to infectious aerosols. Additional containment and procedures, such as those described for BSL-3, should be considered with producing, purifying, and concentrating feline leukemia virus, based on risk assessment.

Storage: -70°C or lower.

Section 8 – Exposure Controls/Personal Protection

OSHA PEL/NIOSH REL: Contains no substances with occupational exposure limit values.

Ventilation: Work in a biological safety cabinet to reduce the possibility of exposure.

Respiratory Protection: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.

Hand Protection: Wear latex or nitrile gloves.

Eye Protection: Wear laboratory safety glasses or goggles.

Skin Protection: Wear a laboratory coat.

Section 9 – Physical and Chemical Properties

Appearance: Slightly whitish liquid.

Odor: Odorless.

Section 10 – Stability and Reactivity

Stability: No specific data.

Conditions to avoid: No specific data.

Materials to avoid: No specific data.

Hazardous Decomposition or By-Products: No specific data.

Section 11 – Toxicological Information

LD50: Unknown.

www.h-h-c.com

Safety Data Sheet

LC50: Unknown.

Eyes: Causes eye irritation.

Skin: May be harmful if absorbed through skin. Causes skin irritation.

Ingestion: May be harmful if swallowed.

Inhalation: May be harmful if inhaled.

Section 12 – Ecological Information

Ecological Information: Avoid release to the environment.

Section 13 – Disposal Considerations

Disposal Methods: This material is infectious and, as such, must be decontaminated before disposal. 1:256 Lysol I.C. or 10% bleach may be used for disinfection.

Section 14 – Transport Information

D.O.T.: Class 6, Division 6.2 (UN3373)

Proper Shipping Name: Biological substance Category B

IATA: Class 6, Division 6.2 (UN3373)

Proper Shipping Name: Biological substance Category B

Section 15 – Regulatory Information

U.S Federal Regulations

OSHA Hazard: Biohazardous, Irritant

SARA 302/304/311/312 Extremely Hazardous Substances: N/A

SARA 313: N/A

Canada

WHMIS Classification: Class D, Division 3
