

NATtrol™ Molecular Products

Molecular Controls & Panels for Infectious Disease Testing

Millions of people are tested for infectious diseases annually. Accurate and sensitive diagnostics are necessary to confirm that laboratories are providing patients with proper results as the implications of reporting either a false positive or a false negative can be devastating to the patient. Using external run controls and verification panels on a consistent basis helps to maximize additional confidence in your test results.

The routine and repetitive use of ZeptoMetrix® NATtrol™ External Run Controls and Verification Panels enables laboratories to monitor daily test variation, lot-to-lot test kit performance, individual operator performance and provides assistance identifying trends in laboratory results.

ZeptoMetrix NATtrol controls and panels are available for several key diagnostic areas, including Respiratory, Gastrointestinal, Women's Health & STIs, Healthcare-Associated Infections, Blood Cultures and Critical Infectious Diseases.
